## **APEC'S QUALITY MANAGEMENT SYSTEM**

APEC's Quality Management System follows the guidelines and directions set by: Australian and New Zealand and International Standards (AS/NZS – ISO) 9002 Quality Systems for Production, Installation and Servicing.

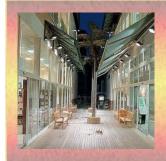

The company's prime objectives are to prevent and detect any non-conformity during supply and installation of our primary services and to implement means to prevent its recurrence.

In setting up such a system, APEC has reviewed its Management and Planning practices and each of the requirements detailed in AS/NZS ISO 9002. The standard has been considered in relation to the Company structure, objectives, the market that APEC Electrical & Communication Services serves and the type of work that the company is competent to undertake.

AS/NZS ISO 9002 is identified under the headings and appendices that are set out in this management plan's Table of Contents. Similar references have been applied throughout this plan.

## AS/NZS – ISO REFERENCES – DETAILED

The Australian and New Zealand Standards on Quality Systems are identical to and have been reproduced from the International ISO9000 series. Other relevant Australian Standards are contained in the AS3900 Quality Management & Quality Assurance Standards series. The most important standards in the context of this management plan includes but are not limited to:
